

GETTING STARTED WITH MONGODB FOR CFML DE- VELOPERS

Dan Skaggs
Mercenary Developer

WHO IS THIS OLD GUY?

Please change me!

WHY ARE WE HERE?

Please change me!

WHAT IS MONGODB?

- Data store like you've maybe never seen before.
- Document oriented, not table/row oriented
- Embedded data over foreign keys
- Not transactional
- Easily replicated and sharded for high availability / performance

TABLES VS DOCUMENTS

courtId	courtName	jurisdiction	active	courtTypeId	state
1202	Alabama, Middle District	Federal	1	3	ALABAMA
1203	Alabama, Northern District	Federal	1	3	ALABAMA
1204	Alabama, Southern District	Federal	1	3	ALABAMA
1205	Alaska	Federal	1	3	ALASKA
1206	Arizona	Federal	1	3	ARIZONA
1207	Arkansas, Eastern District	Federal	1	3	ARKANSAS
1208	Arkansas, Western District	Federal	1	3	ARKANSAS
1209	California, Central District	Federal	1	3	CALIFORNIA
1210	California, Eastern District	Federal	1	3	CALIFORNIA
1211	California, Northern District	Federal	1	3	CALIFORNIA
1212	California, Southern District	Federal	1	3	CALIFORNIA
1213	Colorado	Federal	1	3	COLORADO
1214	Connecticut	Federal	1	3	CONNECTICUT

```
{
  "_id" : ObjectId("534375d40fff56a472b25891"),
  "courtName" : "Alabama, Middle District",
  "jurisdiction" : "Federal",
  "active" : true,
  "courtType" : "District",
  "state" : "Alabama"
}
```

WHY MONGODB?

- It's FAST!
- It's FLEXIBLE!
- It's FORGIVING!

INSTALL IT ALREADY

Ok fine, Mr/Mrs Impatient

Full install instructions at
<http://docs.mongodb.org/manual/installation/>

MAC / *NIX INSTALLATIONS

Using a package manager

```
brew install mongodb  
yum install mongo-10gen mongo-10gen-server  
sudo apt-get install mongodb-10gen
```

Direct Download and Extract

```
curl -O http://downloads.mongodb.org/osx/mongodb-osx-x86_64-2.4.10.tgz  
tar -zxvf mongodb-osx-x86_64-2.4.10.tgz  
mv ./mongodb-osx-x86_64-2.4.10 /mongodb
```

WINDOWS INSTALLATIONS

Direct Download and Extract

- Download the binary to match your system architecture from <http://www.mongodb.org/downloads>
- Unzip the file to c:\mongodb

Install as a Windows Service

```
C:\mongodb\bin\mongod.exe --config C:\mongodb\mongod.cfg --install
```

Using Chocolatey package manager

```
cinst mongodb
```

NOW WHAT?

Hint: Run it!

Mac / *nix

```
mongod
```

Windows

```
c:\mongodb\bin\mongod.exe
```

```
Macintosh HD — bash — 120x28
Dans-Macbook-Pro:/ dsagg$ mongod
mongod --help for help and startup options

Dans-Macbook-Pro:/ dsagg$
```

CONFIGURE YOUR DATA DIRECTORIES

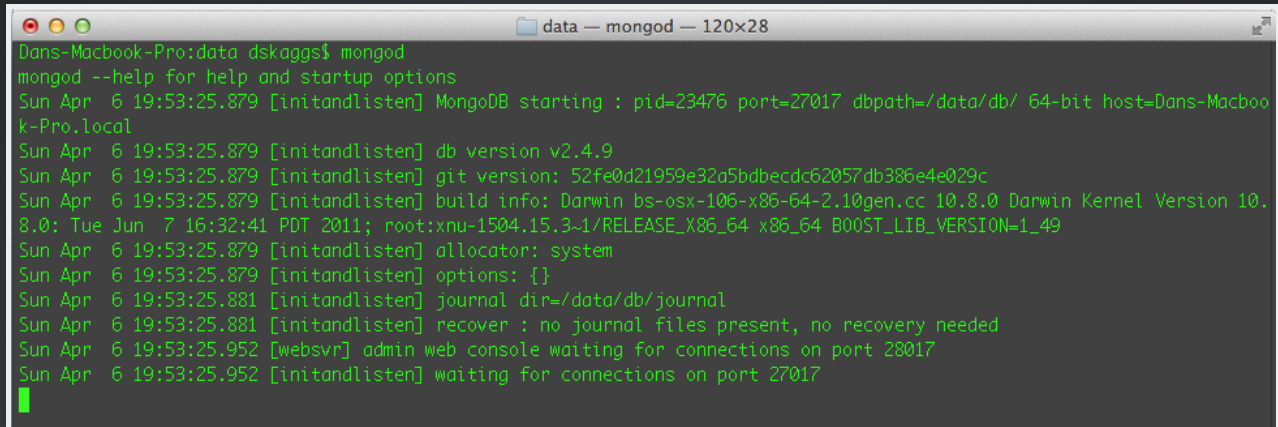

Create the required directories:

- Mac / *nix: /data/db
- Windows: c:\data\db

Non-defaults can be used with a command line option:

```
mongod --dbpath /path/to/my/folder  
mongod.exe --dbpath "d:\path\to\my\folder"
```

SUCCESS!

A terminal window titled "data — mongod — 120x28" showing the output of the "mongod" command. The logs indicate a successful startup of MongoDB version 2.4.9 on a Mac OS X system. The window has a standard macOS title bar with red, yellow, and green buttons.

```
Dans-Macbook-Pro:data dskaggs$ mongod
mongod --help for help and startup options

HOOK ME UP WITH SOME DATA!

- mongo - Command Line client
- CFMongoDB - DSL for using MongoDB from CFML
- Railo MongoDB Plugin

MONGO COMMAND LINE CLIENT

```
> db.burials.find( {'last_name': 'Graham', 'cemetery_state': 'AL' })
  .limit(1).pretty()
{
  "_id" : ObjectId("53341d9f9b46a8412acf580f"),
  "first_name" : "Thomas",
  "last_name" : "Graham",
  "suffix" : "Jr",
  "cemetery_name" : "FORESTLAWN GARDENS",
  "cemetery_addr_one" : "730 GOLDEN SPRINGS RD",
  "cemetery_city" : "ANNISTON",
  "cemetery_state" : "AL",
  "cemetery_zip" : 36207,
  "relationship" : "Veteran (Self)",
  "branch" : "US ARMY",
  "rank" : "SSG",
  "war" : "VIETNAM"
}
```

CFMONGODB

- Could just use Java driver but why reinvent the wheel
- Easy to use custom DSL or API built in
- Multiple people already have done a lot of work to make it easy to communicate with MongoDB through the Java driver
- Allows nearly seamless translating of ColdFusion structs and arrays to MongoDB and vice versa
- Works with ColdFusion 9.01+ and Railo 3.2+

RAILO EXTENSION

- Need research here
